- Targets observable, tangible changes in system and staff behavior
- Not episodic events or activities
- Not reliant upon a specific, externally marketed product
- Generally require cross-functional, multi-year efforts to full implement
- Sufficient impact to transform statewide practice and improve one or more priority outcomes

Strategic Theme: *Include the title of your strategic theme from the strategic planning framework.*

Team Members: *List team members in alphabetical order by last name, with their title and department/organization.*

Objective 1: *Include the objective from the strategic planning framework.*

Success Defined: *If this objective is achieved, how will we know? What changes will we observe in children, families, providers and systems? What results will improve?*

Strategic Initiative 1A: *Include a short phrase or title that defines the effort on the part of the district that will bring about fundamental changes to improve this objective.*

Brief Description: *Add a few sentences to more fully articulate what this strategic initiative entails. Describe what will be developed or implemented, the types of employees targeted and what changes in behavior are required. Do not detail the action steps or resources needed to implement the initiative – this will occur in the action planning stage to follow in January.*

Rationale: *Provide references to support the efficacy of this initiative in improving the objective. What evidence or experience suggests this effort will bring about the desired change? How does this initiative reflect stakeholder input?*

Important findings for implementation: *If your research revealed essential practices or conditions that are necessary for effective implementation of the initiative, include those in this section.*
